ECONOMIC AND FISCAL UPDATE - NŪTI NO TE KIMI PŪ’APINGA E TE MONI

The recovery in the economy has been faster than anticipated and is driven by the number of tourists visiting the Cook Islands, since the reopening of the borders in January 2022. The 2022/23 fiscal period is expected to achieve nominal GDP growth of 13.9%, followed by 10.2% growth in 2023/24 due to improved access to Australia and the US. By 2024/25 and 2025/26, moderate growth in GDP is expected.

The Consumer-Price-Index (CPI) indicates that the prices are rising at the fastest rate in more than a decade. Price increases are being driven by external factors, such as the conflict between Russia and Ukraine on the costs of fuel and food, and the global supply constraints on the price of goods. The graph below shows signs that the price growth will ease after its peak of 9.4% in 2022/23.
