The economic impacts of COVID-19, triggered an exit clause from the fiscal rules which underpin the MTFS to allow the Government to respond effectively and reduce potential economic scarring. Despite this, Government is committed to an expenditure profile which sees a return to adherence to the rules by 2024/25, when net debt is expected to fall below the hard debt cap.

The size of the economic shock prompted Government to respond to the crisis with all resources available to it, including the allocation of funds from the \$56.7 million Stabilisation Account, to pay for the Economic Response Plan Phase II (ERP).

- Revenue estimates are relatively higher in the 2020/21 HYEFU than the 2020/21 Budget due to an increase in donor support offsetting the significant decrease in taxation and fishery estimates. In contrast, upward revisions to operating and capital expenditure have been relatively small. A fiscal deficit of \$130.4 million is forecast for the year and will be financed through debt and existing cash reserves until the fiscal situation improves.
