

Kia orana,

I will short,

First, a reform in the Police will clear the sky for wisdom. It may sound unrealistic, Police holds the special key for governing. They key keeps everyone under the law. Second, our children. Where do we want them in 30years time? We do not need to spent on foreign consultants. This is how we invest into the future, invest into our Tamariki. We will lack nothing if our children is better educated. Sea bed mining, How? My suggestion, money received from mining must be invested into a Swiss bank and we only take out the interest. Shipping, outer islands needs it. That should happen sooner. Tourist, limited the numbers a year, unless we have proper sanitation, we cannot suffocate our environment.

Thank you
